

WHITE PAPER

ABOUT METADOG

MetaDog was built on the evolution of meme dog tokens, which has been widely hyped and accepted by millions of crypto community. From doge to shiba inu and floki etc.

This has shown the massive love for dogs in crypto space and our team has been thinking and brainstorming of a way we can add fun interaction between the crypto dog community that can help to expand and unite the love of dogs among crypto audiences.

That's how the idea of MetaDog was born, the first and currently the only crypto Dog Racing game

that features top 6 meme dogs. This can not go without saying that we got inspiration from the original Greyhound dog racing which are dog racing tournaments played in various countries like the United Kingdom, United States, New Zealand, Ireland and Australia. Now you will be able to play through the MetaDog blockchain platform.

We believe this is going to be a unique and fun game for the crypto meme dog community as we bring even more fun to the love of dogs in the crypto space. Allowing you to choose and place bets on your favorite crypto dogs.

METADOG GAME

METADOG game is played on MetaDog Stadium, which is the name of the ground/stadium where all the racing takes place. At the moment we have top 6 meme dog tokens available in the race, but we do have plans of expanding this to 8 dogs in future.

At first we are going to release a beta version of the game, this is to

show the crypto community how the dog racing game we are building is going to be and also to collect community feedback on things that need to be improved on the game and audience engagement.

The METADOG game is built for the crypto meme dog community as we believe that this is going to bring more fun and excitement.
